

HAPPY HUMAN WARRANTY

SoundTools products are built to endure even the harshest live sound and audio environments. We are so confident in the reliability of our SoundTools products that every unit is covered by the Happy Human Warranty. If for any reason you're unhappy with any of your SoundTools products, simply return it to the place of purchase in its original packaging within one year for a full refund, no questions asked.

SoundTools road-tests all products for lifelong durability. If you experience any unhappiness after the one year warranty then we will happily replace your SoundTools product with a new or reconditioned unit, for life.

For warranty help, please contact your local dealer, email us at support@soundtools.com, or visit support.soundtools.com

THANK YOU!

We hope you enjoy your new SoundTools SuperCAT Sound Tails, our easy-to-use four channels over shielded CAT5e breakout cable.

One of our main goals here at SoundTools is to create useful and quality tools for every SoundHuman's toolbox. If you ever have questions or want to share a cool way you've been using your SoundTools product, feel free to reach out!

We'd love to see your product in action! Tag us and don't forget to #SoundTools

SUPERCAT SOUND TAILS MALE XLR STARTER GUIDE

Made For And By Sound Humans

Step 1:

Use channels 1 thru 4 to connect your XLR lines

Step 2:

Connect the etherCON/RJ45 end to a compatible connection such as a SoundTools CAT Box, CAT Rack or CAT Tails

OR

Use a shielded etherCON connector, such as the Neutrik NE8FF feed-through coupler to connect to another shielded CAT5E/6/7 or shielded RJ45 cable.
