

HAPPY HUMAN WARRANTY

SoundTools products are built to endure even the harshest live sound and audio environments. We are so confident in the reliability of our SoundTools products that every unit is covered by the Happy Human Warranty. If for any reason you're unhappy with any of your SoundTools products, simply return it to the place of purchase in its original packaging within one year for a full refund, no questions asked.

SoundTools road-tests all products for lifelong durability. If you experience any unhappiness after the one year warranty then we will happily replace your SoundTools product with a new or reconditioned unit, for life.

For warranty help, please contact your local dealer, email us at support@soundtools.com, or visit support.soundtools.com

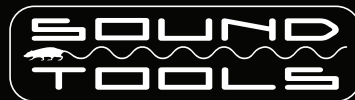

THANK YOU!

We hope you enjoy your new
SoundTools WallCAT 5!

One of our main goals here at SoundTools is to create useful and quality tools for every SoundHuman's toolbox. If you ever have questions or want to share a cool way you've been using your SoundTools product, please reach out!

We'd love to see your product
in action! Tag us and don't
forget to #SoundTools

WALLCAT 5 MX STARTER GUIDE

Made For And By Sound Humans

WallCAT 5 MX Starter Guide

Step 1:

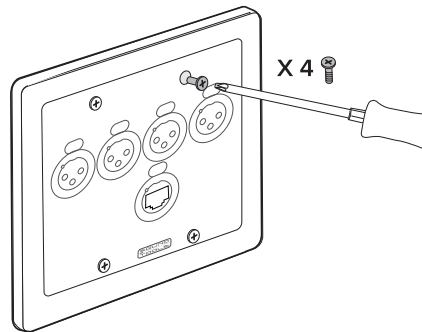

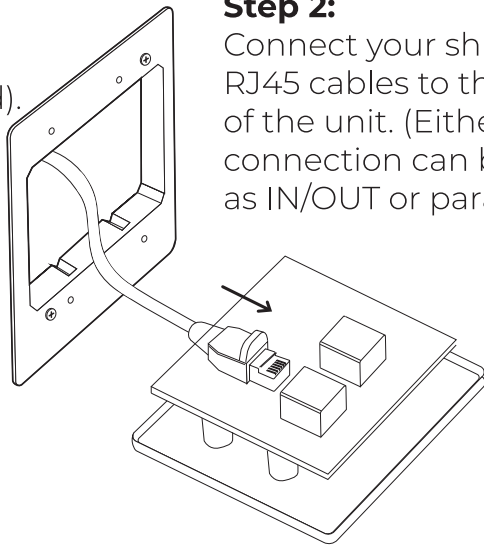

Install UL North American two gang wall outlet mount* into the wall. (An open back or closed back outlet mount can be used).

**not included*

Step 2:

Connect your shielded RJ45 cables to the back of the unit. (Either RJ45 connection can be used as IN/OUT or parallel)

Step 3:

Screw WallCAT 5 into the outlet box using included screws

Signal Types

Each of the four XLR channels are isolated, meaning you can run different types of signal simultaneously over the same CAT cable. For mixed signal levels a U/FTP or S/FTP is recommended.

etherCON Thru

Utilize the front etherCON to connect any SoundTools Analog Audio Over CAT unit to XLRs 1-4. Compatible with both regular RJ45 and etherCON, the front port makes for a quick parallel signal split.
